The **Aquasanita DR-001** dispenser is a great addition to any kitchen or bathroom. Thanks to the fact that the dispenser container is hidden, it doesn't take up any unnecessary space. The dispenser can be filled with a wide range of products according to your preferences.

## **For kitchen and bathroom**

In the kitchen, it serves as a jar dispenser. In the bathroom, it is used as a liquid soap dispenser. In public washrooms, they can be used as gel or disinfectant dispensers.

## **Universal use**

The dispenser can be filled with a wide range of different preparations (cleaning agents, soaps, shower gels, body and facial cosmetics...).

## **Easy fulfillment**

To fill, simply pull out the tap and pour in the content through the opening. It is not necessary to unscrew the dispenser.
