Our Donner INT VI filter is designed for perfectly clean and safe water in pools and hot tubs.

The set includes two pieces of antibacterial filters INTVI, which are compatible with Bestway type VI filters designed for Lay-Z SPA hot tubs.

Donner INT VI Filter for pools and spas / hot tubs is certified and tested by the IAPMO organization according to NSF/ANSI 50. The filter is made of lead-free and BPA-free materials.

The Donner INT VI filter cartridge is made **from Trilobal fabric**. Advanced technology enlarges the filtration area, improves dirt-holding capacity without reducing flow. The innovated Dirt-Locking technology ensures that the fabric captures much more dirt than other regular filters. This filter effectively removes hair, leaves, dust, sediment, sand, etc.

Reinforced covers are not only resistant to breakage, but they are also **resistant to chemicals** commonly found in pools and spas. Unique structure of filtration fabric.

For brilliantly clean water, we recommend changing (approximately once a month) and cleaning (approximately once a week) the filter regularly. The great advantage of the Donner INTVI filter is its easy **rinse and cleaning (with running water)**. For removing coarse impurities, you can use a high-pressure cleaner. After cleaning, it is again like new and ready for further use. The package contains 2 filtration inserts. The filter replacement is easy - you just need to unscrew the top cover of the pump, remove the seal, and insert the filter.

Key Features of the DONNER INT VI Cartridge Filter
