Bezproblémové propojení přepadu dřezu s drtičem

EAN: 8596220002907

290 Kč

240 Kč bez DPH

The EcoMaster installation kit is designed for easy connection of sink overflow with a garbage disposal.

In the package, you will find everything you need to connect the overflow to the outlet elbow of the disposer, see. The waste elbow from the disposer is equipped with an additional inlet with a flange, which most plumbers cut off and then connect the overflow with a garden or other hose.

Use this set for professional connection of the overflow without the need to shorten the additional inlet. The result will be a perfect connection of the sink overflow with the waste disposal unit.

- flexible hose 60cm (can be shortened as needed)
- 2x end cap 22mm; 1x end cap 19mm (inner diameter)
- 2x clip

Parameters

Basic parameters

Weight including packaging (kg):	0.3
Width of the packaging (cm):	20
Height of packaging (cm):	Unfortunately, you haven't provided any Czech text to translate. Please provide the text you would like to be translated.
Depth of packaging (cm):	26
HS code:	39229000
Warranty:	2
