The replacement water filter **Spring Source CMF002** is compatible with the **Jura Clearyl WHITE** filter. The filter is designed for Jura coffee machines and is installed directly into the water reservoir. It adjusts the water pH to neutral.

Spring Source CMF002 Filter Insert contains high-quality ion exchange resin and activated carbon, which stabilize calcium carbonate and remove impurities. This improves the taste and aroma of coffee. The filter increases the performance and efficiency of the coffee machine. It also extends its lifespan by keeping the machine clean. It prevents the coffee machine from being contaminated due to calcium deposits.

The Spring Source CMF002 water filter takes care of improving the quality of water and therefore **prevents the formation of limescale** inside the coffee machine.

The filter is made of food-grade materials certified by NSF, without any lead content. It does not contain any harmful substances. It complies with European regulations on food quality EC-1935/2016, ROHS, REACH, BPA-Free, TUV.

We recommend **changing the filter every two months** in the coffee maker. The replacement of the filter is very quick and easy.

Key features of Spring Source CMF002 water filter

- certified by NSF42, WQA, TUV Certification
- high-quality lead-free filter cartridge
- effectively removes impurities
- improves the taste and aroma of coffee
- the filter increases the efficiency of the device, extends the lifespan of the coffee maker
